

Release Routing Appendix

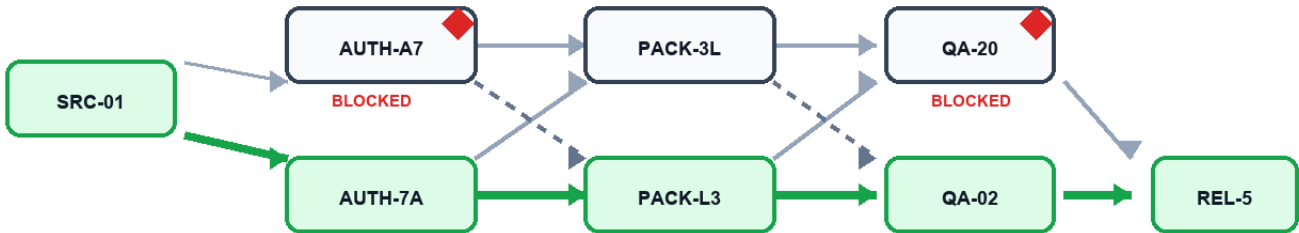

Document ID: H8-ROUTE-TOPOLOGY

This appendix tests whether a document conversion model can reconstruct a routing diagram without relying on surrounding text to reveal the selected path.

Routing Diagram

Release routing diagram - ROUTE-19

Recover the selected route, blocked nodes, and fallback-only edges from the diagram.

Legend:

green arrows = selected route; gray arrows = not selected; dashed gray = fallback only

Fallback only:

PACK-3L -> QA-02 and AUTH-A7 -> PACK-L3

Warning:

AUTH-A7 is not AUTH-7A; PACK-3L is not PACK-L3; QA-20 is not QA-02.

Do not infer route from position alone; use green arrows only.

Action

Use the selected route shown in the diagram. Do not use blocked nodes.
