

# Three-Column Launch Poster

## Signal

North funnel shows high visits but weak activation. Do not combine with partner leads.

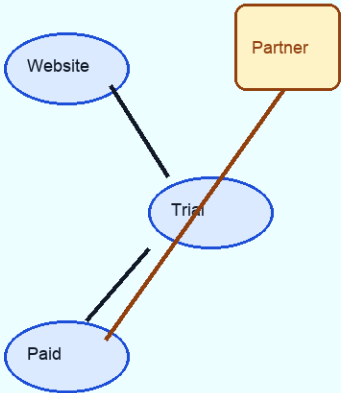

Mini table

| Region  | Visits | Act.  |
|---------|--------|-------|
| North   | 18k    | 4.1%  |
| West    | 9k     | 7.8%  |
| Partner | 3k     | 11.2% |

Risk: North volume

## Evidence

Figure A traces the evidence chain. Website visits feed trial starts, but partner leads bypass trials.

## Decision

Decision: launch West first, hold North until activation improves, and track Partner separately.

APPROVE WEST

Margin note: Partner leads are not part of North.
