

NOC Handover Packet - Week 32

Packet prepared for the 2026-08-03 reliability handoff.

Handoff scope

- Normalize the raster Gantt into task rows
- Preserve GTM lane/month ownership
- Bind team-matrix facts by column
- Read heatmap color + letter + slash state

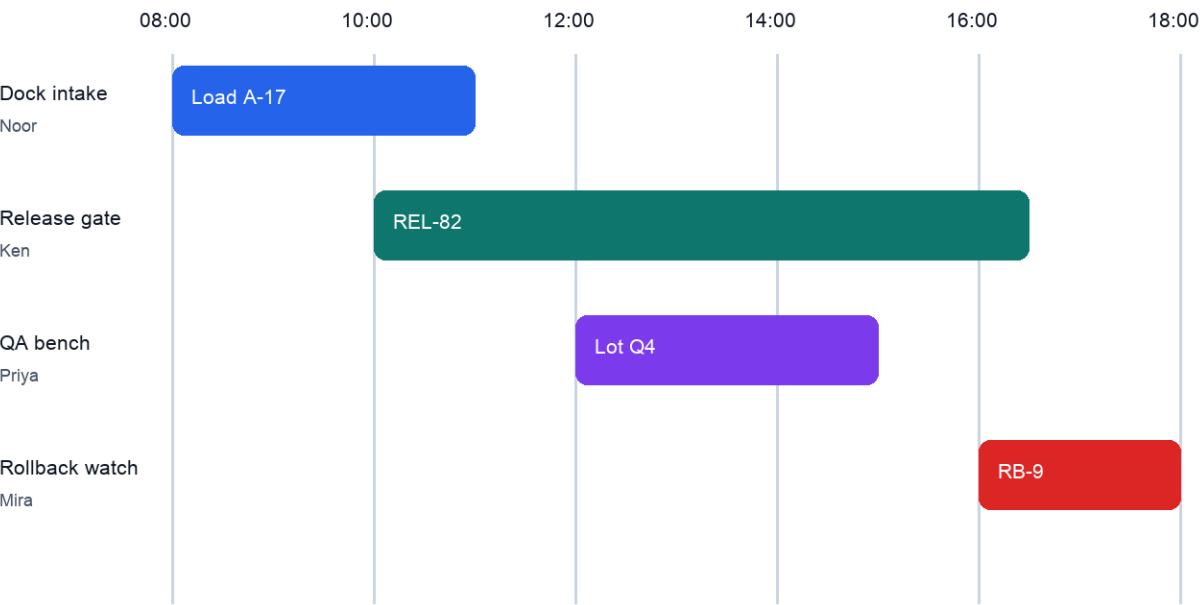

Why this packet exists

- Several pages are image exports
- Some tables have no borders
- Some values are visual-only
- Weekend columns are in scope

Page	Artifact	Reconstruction obligation
1	Cover	Preserve scope and page order
2	Raster shift Gantt	Infer start/end from bar positions
3	Overlapping GTM timeline	Bind card to lane and month span
4	Borderless team matrix	Bind facts under each person column
5	Escalation heatmap	Preserve color/letter/slash/weekend semantics

This is a realistic handover packet assembled from exported slides and status inserts.
Do not flatten it into a summary; reconstruct each artifact where it appears.

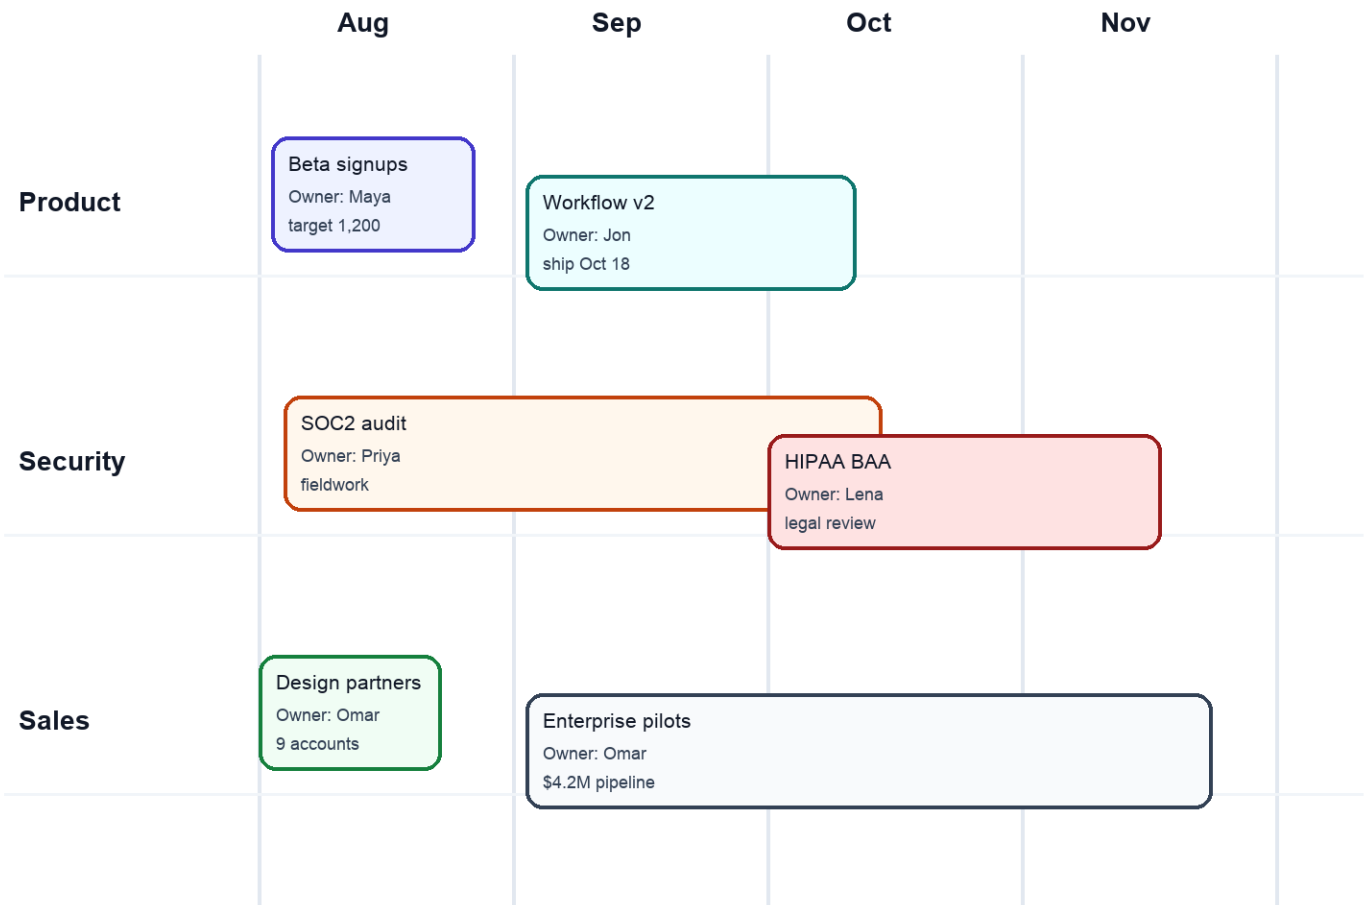

Raster Gantt Shift Schedule

Gold must normalize each bar into task, owner, start, end, and label rows.

Overlapping GTM Timeline Slide

Investor update slide. Read each lane left-to-right; exported cards overlap.

Footer: Board packet GTM-09. Preserve lane, month span, owner, and dependency.

October dependency

HIPAA BAA belongs to Security, not Product. Enterprise pilots depend on BAA legal review.

Borderless Team Matrix Pitch Slide

Series A team slide. Names are column headers; facts below align vertically.

Core team

Borderless matrix exported from slides. Preserve each person-to-fact binding.

	MS Maya Singh	JB Jon Bell	PN Priya Nair	OH Omar Haddad
Role	CEO / Product	CTO / Infra	COO / Ops	GTM / RevOps
Former	ex-Stripe	ex-Snowflake	ex-Flexport	ex-Atlassian
Proof	12 yrs product	owns retrieval infra	scaled support	pipeline \$4.2M
Owns	led Relay launch	built vector cache	owns compliance	leads enterprise sales

Advisors

Lena Ortiz - former CISO, Okta
Theo Park - ex-CFO, Datadog

Hiring next

VP Sales - Q4
Clinical Lead - Q1

Landscape Heatmap Escalation Plan

Page is shown in portrait, but the matrix is a landscape insert.

Escalation heatmap: color + letter both matter

	Mon	Tue	Wed	Thu	Fri	Sat
API	G	Y	Y	R	R	Y
Data	G	G	Y	Y	R	R
Export	Y	Y	R	R	Y	G
Billing	G	Y	G	Y	Y	R

Legend: G green normal; Y yellow watch; R red escalation. Diagonal slash means owner must page incident lead.

Reviewer instruction: derive the red slash cells from the matrix itself. Do not infer severity from row totals. Export Friday must be read directly from its cell.

Note: weekend columns are part of the table and must not be dropped.
